

# ABSTRACT

The present invention provides a gelled composition comprising a polymer and a solvent, said polymer being  
 5 obtained by an addition reaction between a linear copolymer having two terminal hydrosilyl groups and a compound having 3 or more ethylenic double bonds, wherein

said linear copolymer being formed by copolymerizing a compound represented by the formula (A):

and a compound represented by the formula (B):

said compound having 3 or more ethylenic double bonds being a compound represented by the formula (D):
